## OF LOCAL INTEREST

**A FORMER PHOENICIAN.**—Mr. Thomas F. Grindell, a former resident of Phoenix and of Tempe, died in the city yesterday after a long illness. Mr. Grindell was at the head of the Douglas schools. Mr. Grindell has many warm friends in all parts of the valley who gladly welcomed his return. Mr. Grindell's object in coming was to dispose of his cattle interests in the southern part of the territory. But for other plans Mr. Grindell has in mind he would not retire from the cattle business. It has been not only profitable but very pleasant. For two years he rode the range himself and became a cowboy of the cowboys so that he is about to sever his relations with the range with reluctance.

**DEATH OF MRS. MAPLE.**—Mrs. Julia A. Maple, wife of E. R. Maple, died last evening at 8:10 o'clock at the family home, No. 900 Thirteenth street. Mrs. Maple was 34 years old and had been an invalid for many years. The family came here from Oklahoma seven years ago that she might receive the benefits of a milder climate. Besides the bereaved husband, Mrs. Maple leaves her immediate family, a son, approaching manhood, and two other children, of tender years. The funeral service will be held at the family residence this afternoon at 3:20 o'clock and will be conducted by Rev. W. H. Bagby of the Christian church.

**HE DREW A GUN.**—C. R. Wilson, a collector, was arrested yesterday morn-

Time seems most untimely when he brings a woman to the turn of life. Life is at its ripest and best for her, and she approaches this change with a dread of its effect born of her knowledge of the sufferings of other women at this season.

There is not the slightest cause for fear or anxiety at this period if Dr. Pierce's Favorite Prescription is used. It gives health of body and cheerfulness of mind, and by its aid the pains and pangs of this critical period are prevented or cured.

Dr. Pierce's Favorite Prescription is woman's medicine with a wonderful record of cures of womanly diseases. Diseases that all other medicines had failed to cure, have been perfectly and permanently cured by the use of "Favorite Prescription."

"I feel that my duty to write you as I have received so much benefit from the use of your medicine," says Mrs. Lizzie A. Bowman of New Matamoras, Washington Co., Ohio. "I have taken four bottles of 'Favorite Prescription' for female weakness and change of life. Before I began taking it I could not do anything. I had such pains in my head and in the back of my neck that I thought I would lose my mind. Now I can work every day. I recommend 'Favorite Prescription' to all females suffering in the period of change of life. It is the best medicine I have found."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Keep the bowels healthy by the timely use of Dr. Pierce's Pleasant Pellets.

## 160 Acres

**Allen & Wilson,**  
47 N. Center street.

ing on the complaint of Jacob Waskins charging him with exhibiting a weapon in a threatening manner. Waskins is in the clothing business on East Washington street. Wilson had bought some clothing and on Friday night returned to change it. He selected a suit of greater value and having no money with him proposed to leave a part of the suit for security that he would call the next day and settle. The security was not believed by Waskins to be sufficient. Wilson started out of the door with the clothing and Waskins barred the way. It was then that Wilson drew the gun, Waskins held his ground and Wilson laid the clothing down. Yesterday morning he went back to the store and paid the balance, but Waskins believed that he ought to be taught that the drawing of a gun is a reprehensible act and he swore out the warrant. The case will be tried by Justice Burnett tomorrow.

**FANCY POOL SHOTS.**—The exhibition of fancy shots at the Hotel Adair's billiard parlors last night, by Fred B. Hall, called out as big an audience as the place would accommodate. The exhibition was marvelous, all that it had been promised to be.

**CARELESS AND UNGALLANT.**—Two young ladies living in the western part of the city have grievances against two conductors of the street railway—one for carelessness and the other for ungallantry. On Friday night they were returning from a meeting in the Brill addition. Before reaching this end of the northern addition line they received transfer tickets and boarded a west bound car. The conductor did not come around until the car reached Second street, and when they showed him their transfers he told them that they were not good; that they were marked 8:10 instead of 9:10, the time of his car. The ladies, believing that they were entitled to a transfer, and the conductor admitting it, they refused to pay fare again. But the conductor was insistent in the matter of what he believed to be a strict compliance with the rules though a brother conductor had made a mistake of an hour in his time and the young ladies were compelled to leave the car in front of the opera house.

**THE WISH HOMICIDE.**—The Solomonville Bulletin, which reached here yesterday had an extended account of the examination of Lon Wish, the young man who killed his stepfather, Dr. C. L. Wish. The result of the examination was that the young man was exonerated and congratulated by most of those in the court room. It appears from the testimony, some of which is printed verbatim, that Dr. Wish had made threats to kill not only his wife, but his stepson and daughter. There threats were repeated to the young man who was at the house and armed. When the doctor approached he was ordered not to advance. The doctor, among other things, it was found that he had been making a systematic effort to poison his wife and was only hiding the time when he would destroy himself and family. The man was undoubtedly "crazy." The same paper also says many of the details of the evidence are unfit for publication.

A special train over the M. & P. railroad will leave for Tempe on next Monday evening, Feb. 1st to accommodate those wishing to attend the meeting of the O. J. W. and Degree of Honor lodges at that place. A big time is promised and all members of the order and their families and friends are invited to attend. The train leaves at 7:30 in the evening, returning after the entertainment.

George Felton will ride at Eastlake park Sunday Jan. 31 among the other notable riders.

## PERSONAL.

Among the passengers leaving via the Santa Fe train this morning were: F. Newport, for Los Angeles; Mr. and Mrs. E. M. Latham, for El Paso; H. M. Horton, for Flagstaff; Mr. and Mrs. B. E. Farrier, George Cannon, Maurice Miller, A. B. Lanchard, for Chicago. The following names were passengers on last night's southbound M. & P. train: J. H. Poyer, Chicago; Mrs. F. K. Howard, Chicago; Mrs. E. Peterson, San Francisco; Herbert Abbott, Los Angeles; David Steele, Los Angeles; David Croxley, Los Angeles; Mrs. R. A. Maddox, Los Angeles; Fred K. Albers and wife, San Bernardino; Ed. Barrett, Lordsburg, N. M.; H. Hatfield, Lordsburg, N. M.; Arthur Gilliam, Lordsburg, N. M.

At the Adams hotel yesterday the following named were registered: E. M. Latham and wife, Los Angeles; H. W. Stevens, Chas. Reynolds, Middleton, Conn.; J. B. Tomlinson, Prescott; J. M. Dyer, Detroit; W. C. Bashford, Prescott; Dr. J. J. Herriek, Boston, Mass.; H. T. Schafer and wife, Boston, Mass.; M. A. Smith, Tucson; Mr. and Mrs. B. E. Farrier, Jersey City, N. J.; M. W. Hunter, San Francisco; Maurice Miller, Johnston, Pa.; R. C. Sample, El Paso; L. H. Merton, Chicago; John H. Wright, St. Louis, and Thos. Grindell, Douglas.

The following named were registered at the Commercial hotel yesterday: R. E. Fuller, Mesa; J. Doydile and Henry Proctor, Tempe; Ernest Sinclair, Berkeley, Cal.; J. E. Porter, Long Beach, Cal.; Schuster, St. John; A. T. J. Matthews, Tempe; May Bremer, Klamath; Annes Keating, Florence; J. Noble, Florence and J. Jones Buckeye; Geo. Melthomer and wife, Muskegon, Mich.; P. A. Wagner, Duquesne, Pa.; W. L. Brown, New York; J. Teitelbaum, Denver; Hall Bros, Wickburg; H. Dinger, and wife, and E. F. Klutz, Ft. Wayne, Ind.; H. I. Maynard, San Francisco; T. H. Withey, Traverse City, and T. A. Woods, Tucson.

J. A. Kilroy has signed contracts with the New York Life, the conditions of which require that his entire time be devoted to the interests of the company. His field is not confined to Arizona. H. William Stevens, who is in charge of the Exposition Mining company's properties near Morris-town, accompanied by Charles Reynolds, representing the Columbia Trust company of Middletown, Conn., spent yesterday in Phoenix.

## PROGRESS AT THE DAM SITE

Interview With Engineer Hill, Who Arrived Here Yesterday.

Mr. L. C. Hill, the engineer in charge of operations at the storage basin, arrived here yesterday morning from Globe, by rail. He expects to leave for the basin again about Tuesday, for the basin again about Tuesday, for the basin again about Tuesday.

Mr. Hill was applied to yesterday for information regarding the status quo of the cement question concerned in the storage enterprise. He said he had absolutely no knowledge of any change in former plans and has heard nothing except what he has seen in the papers. All he can say is that the work of building the plant at the basin is proceeding rapidly and there never has been any stopping of operations. About 75 men are employed there now. There were a few more who were laid off at his instance for the reason only that he thought they could not be economically employed just at that time. But while the force was thus slightly reduced on that special work, the work itself was not delayed. The foundations of the mill are in and the building is now progressing.

Asked to give a general resume of what has been accomplished in the five months since work actively begun and how many men are actually employed, he gave a very interesting interview. He says the force now is practically as large as it has ever been, yet not much larger than it has been for some time. There are approximately 200 men employed in the immediate vicinity of the storage basin, exclusive of those who are freighting in supplies, and cutting and sawing lumber in the mountains.

There are about fifteen men at the saw mills, about ten at Ad. Parish's surveying camp, about thirty at the cadastral survey camp of Mr. Hawley south of Mesa, and about forty at work on the telephone line. These, with the freighters between the basin and Globe, bring the total to about 400 men that are now, and have been for a long time, employed on work connected with the Tonto project in one way or another.

Mr. Hill says he has heard nothing respecting the awarding of contracts on the power canal, but it is a foregone conclusion that as soon as the awards are made there will be several hundred more men put to work almost immediately. Asked respecting a story from Mesa City that as soon as the telephone line is completed, which will be perhaps sixty days, construction of the transmission line would begin for bringing power to the Arizona canal head and thence to Sacaton for pumping purposes, Mr. Hill said he thought there must be some mistake about it for there is no power yet to transmit and cannot be till the power canal is finished.

Regarding the little camp at the basin Mr. Hill says it is rapidly growing into a village of importance. It is now a busy place and the telegraph dispatches say that a postmaster has been appointed, which means that at an early date there will be a daily mail service. The camp or village, as it is now entitled to be called is less than a mile above the dam site and is in the basin. It contains three general stores, a barber shop, a shoe shop, a livery stable, two restaurants, two lodging houses, a meat market, a drug store, a government physician and a private physician. There is also a town hall, put up by private capital, and in which the whole neighborhood dances every Saturday night for a dance.

There is another camp at Livingstone, the head of the basin, 11 miles up the stream, and a third camp of men engaged in road making a few miles below the dam site. He says that in a very short time the road from the dam creek canyon will be practically completed.

Reviewing what had been accomplished in the last five months Mr. Hill said over fifty miles of road has been built, the foundations and part of the superstructure of the cement plant have been built, a brick-yard and lime kiln have been established, water works have been constructed, piping water a distance of three miles, a saw mill has been built, surveys have been run for canals and general topographical surveys have been made and the telephone line is well on the way toward completion. Altogether there is little ground for any rumor that work is about to stop. On the other hand it has been going forward just as fast as possible from the very beginning.

## TREASURY WITHOUT GOLD

The Mints Ordered to Work Double Time.

Washington, Jan. 30.—For the first time in many years the treasury finds itself without any gold coin in its vaults.

It is explained that this condition is the result of an unprecedented demand for gold certificates during the time when the mints have been fully employed in coining Philippine silver and subsidiary silver for the United States. The increased demand for gold certificates which could only be issued for gold coin in the treasury, came about through the needs of the large banking institutions in the great commercial centers which had large amounts of notes of small denominations on hand which they wished to exchange for gold certificates of larger denominations. The secretary has given instructions for the mints at Philadelphia and San Francisco to begin the coining of double eagles on February 1, and to work overtime until a sufficient supply has been coined to meet all demands.

## A CHICAGO EXPERIMENT

It Was Designed to Reassure the Fire Fighters.

Chicago, Jan. 30.—Half a million cartridges were exploded on the lake front this afternoon, in an experiment undertaken by dealers in ammunition to prove to the members of the department that such articles were not

## When Your Cold Catches You Just There

There  
is No  
Time  
to  
Wait.

It is not a "little thing." It's a deadly thing. It will not "get well by itself" if you let it alone. Whiskey and quinine and such things brace you up for the time, but they don't cure you.

Ask any intelligent doctor why you catch cold so easily. He will say, "Because you are a bit run down." He means that the force which nature placed in your body to keep out disease germs—the resistive force—is weakened. The door is open a little way toward disease.

There is not a graveyard in any cemetery in the world caused by consumption or pneumonia or any lung trouble whatever, which did not start with what you call "Nothing but a cold."

A cold should not be beaten back or drugged over—it should be cured, and the general health should be built up.

## ACKER'S ENGLISH REMEDY

should be taken at the first symptoms of cold. It is a tonic for the whole body, a specific for sudden colds, coughs or sore throats. It doesn't matter where the cold is or how it got there, we know that Acker's English Remedy will reach it and cure it. It is sold on a positive guarantee.

**NO OURE NO PAY.** If you have a cold—no matter how slight—it means something. Take Acker's English Remedy at once. Keep it in the house. If it does not relieve you almost instantly, we will refund you the price paid.

"ACKER'S ENGLISH REMEDY saved my life. A cough, slight at first, grew constantly worse and I finally had to give up my work in the Knife Factory at Walden. I had frequent bleeding spells. Was examined by local doctors, prominent physicians in New York and at a Medical College. They all pronounced my case hopeless. I began using Acker's English Remedy and a few bottles cured me. I am today a perfectly well man." (Signed) A. H. SIMPSON, Walden, N. Y.

Acker's English Remedy is sold on a positive guarantee that the purchase money will be refunded in case of failure. 25c., 50c., and \$1.00 per bottle.

Sold and Guaranteed by the T. F. HUDSON PHARMACY, Distributing Agents.

## We Shall Spend \$500,000 To Give Liquezone Away.

This Company, after testing Liquezone for two years in the most difficult germ diseases, paid \$100,000 for the American rights. That is the highest price ever paid for similar rights on any scientific discovery.

We are now spending \$500,000 to give the product away—one bottle to each of a million sick ones. We are doing this so that every sick one may let Liquezone itself prove what it can do.

## Kills Inside Germs

The greatest value of Liquezone lies in the fact that it kills germs in the body without killing the tissues. And no man knows another way to do it. Any drug that kills germs internally, and it cannot be taken internally. Medicine is almost helpless in any germ disease, as every physician knows.

Liquezone will do for sick humanity more than all the drugs in the world combined. It does what no skill can accomplish without it. It cures diseases which medicine never cured.

## Acts Like Oxygen

Liquezone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases

are made part of the liquid product. The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality, the most essential element of life. Liquezone is a vitalizing tonic with which no other known product can compare. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill.

The reason is that germs are vegetable, and Liquezone, which—like oxygen—is life, to an animal, is deadly to vegetable matter. It is carried by the blood to every cell of every tissue, and no touch of impurity, no germ of disease, can exist where Liquezone goes.

## Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.
